**DETAILED ACTION**

1. The rejection of claims 1-4, 9 and 13 under 35 USC § 102(a) as being anticipated by Baader et al (DE 10100762 A1) and the rejection of claims 5-8, 11, 12 and 14 under 35 USC § 103(a) as being unpatentable over Baader et al (DE 10100762 A1) set forth in the previous Office Action (mailed on 03 March 2006) are withdrawn.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-9 and 11-16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claims 1, 9 and 15, the expression "significant crimp" constitutes new matter.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1732

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-9 and 11-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1, 9 and 15, the expression "significant crimp" renders the claims indefinite principally because it is not clear what applicant intends to cover by such a recitation (i.e., it is not clear exactly what constitutes "significant crimp").

Claim 13 depends from claim 10, which has been cancelled by applicant.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-5, 9, 11, 12, 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Hamlyn (U.S. Patent 4,251,481 A) for the reasons of record.

Art Unit: 1732

8. Claims 1, 3-5, 9, 11, 12, 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Corsini et al (GB 1352624 A) for the reasons of record.

***Claim Rejections - 35 USC § 103***

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

10. Claims 6-8, 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hamlyn (U.S. Patent 4,251,481 A) for the reasons of record.

11. Claims 2, 6-8, 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Corsini et al (GB 1352624 A) for the reasons of record.

***Response to Arguments***

12. Applicant's arguments filed on 05 June 2006 have been fully considered but they are not persuasive.

13. With respect to Hamlyn, there is no apparent nexus between applicants' arguments concerning relaxation and time and the claimed subject matter because the instant claims do not recite

Art Unit: 1732

anything about relaxation and time. Also, Hamlyn does not appear to be avoiding crimping the yarn because Hamlyn teaches passing the yarn through a steam impinging draw point localizing jet and then withdrawing the yarn using heated draw rolls.

14. Corsini et al teaches removing visible crimps, which meets the limitation of making a flat yarn (by removing "any significant crimp" as claimed). Corsini et al also teaches (Examples) melt spinning, and Corsini et al also teaches drawing, compressing, withdrawing (under heat) and winding (e.g., page 2; lines 37-56).

#### ***Conclusion***

15. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1732

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
